Features

Charting interface

Real time trades and price movement paired with indicators & charting tools on multiple timeframes

Trending list

Trending projects based on different factors like change in liquidity locked, price increase, times favorited, chart views etc. Premium users will be able to switch between timeframes

Verified checkmark

Projects that lock their liquidity provider tokens will have a special checkmark to make them stand out from the rest

Info box

All of the information pertaining to the project in one place. See the initial listing price, circulating supply, total supply, time until locked liquidity tokens get unlocked, time until vesting on the teams/advisors tokens ends, emission rate (if it's a yield farm), volume traded, total liquidity and more
